Behavioral Strategies: Approaches & Techniques to Replace Targeted Behaviors in the Music Classroom

Presented by Brian Wagner-Yeung

This session will examine behavior as a function of communication and focus on specific strategies students can use to replace targeted behaviors. While the focus will be on students with disabilities, the techniques can be applied to ALL students and incorporated individually or for the entire music class. Examples include using predictable, structured routines; developing clear procedures; collecting data to analyze targeted behaviors; and replacing behaviors with appropriate supports.

**Saturday, October 3rd
12:00 – 1:30 on Zoom
CTLE Credits Available
